SAP Labs Syllabus and Round Map

Product Based / SAP Labs

Study Hub Premium Placement Pack

This is original study material for preparation. It is not a copied official or proprietary company paper.

Premium Study System

- Track: SAP Labs.
- Pack type: SYLLABUS / Syllabus.
- Target outcome: selection-ready confidence for SDE / Software Engineer.
- Core preparation areas: DSA, CS fundamentals, OOP/LLD, HLD basics, behavioral stories, resume projects.
- Use this pack like a mini-book: concept, table, example, practice, analysis, revision.
- Every topic should produce proof: solved questions, mock score, mistake note, interview answer, or resume evidence.

Output Quality Rules

- Read the concept in your own words, then solve without looking at notes.
- Convert every important idea into a comparison table, checklist, or one-line rule.
- Mark important traps as Common Mistake before the mock, not after losing marks.
- Keep a PYQ-style log: question pattern, topic, time taken, mistake reason, retest date.
- Use simple English; add Hindi/Hinglish meaning in brackets when it helps recall.

Priority Matrix

Area	Premium Standard	Proof Before Moving On
DSA	Pattern, invariant, dry run, complexity	2 solved problems per pattern without hints
CS Core	OS, DBMS, CN, OOP with examples	Explain each topic in 60 seconds
Project	Problem, architecture, your contribution, tradeoff	2-minute story plus deep-dive answers
Communication	Crisp intro, structured HR stories, calm tone	5 recorded answers reviewed once

Exam Tip

- Interviewers reward clean reasoning more than memorized code. Say brute force, improve it, dry run, then discuss complexity.

Common Mistake

- Jumping into code without constraints creates wrong edge cases. Ask size, duplicates, sorted/unsorted, and expected output first.

Round Map

- Online assessment, coding interview, CS fundamentals, system design basics, behavioral interview.

Topic Checklist

- DSA, CS fundamentals, OOP/LLD, HLD basics, behavioral stories, resume projects.
- Keep one notebook for formulas, patterns, mistakes, and interview stories.
- Mark each topic as Learn, Practice, Mock, Revise.

Deep Syllabus Blueprint

Block	Must Cover	Practice Evidence
DSA Patterns	arrays, strings, hashing, two pointers, binary search, recursion, trees, graphs,	

DP, heap, greedy | 40 pattern questions with notes |

CS Fundamentals	OS process/thread/deadlock, DBMS joins/indexing, CN TCP/HTTP, OOP/LLD	30 short answers plus examples
Coding/Logic	input-output, edge cases, complexity, readable naming	dry run table for every answer
Interview	intro, project, strengths, failure, teamwork, why company	STAR notes and 5 mock answers

Syllabus Completion Ladder

- Level 1 Learn: you understand the concept and can explain it simply.
- Level 2 Practice: you can solve basic questions without hints.
- Level 3 Mock: you can solve under timer with controlled accuracy.
- Level 4 Revise: you can recover the idea from your mistake log after 7 days.

Execution Dashboard

Metric	Target	Review Frequency
DSA Questions	10-14 per week	every Sunday
CS Core Notes	4 topics per week	twice a week
Mock Tests	1-2 per week	same day analysis
Interview Practice	5 answers per week	record and review

Weekly Review Ritual

- Pick the top 5 mistakes, rewrite the correct rule, and solve one similar question.
- Remove one weak resume line or prepare one stronger project answer.
- Decide the next week from evidence, not mood.

Final Self Audit

Score	Meaning	Action
0-40	reading stage	finish basics and easy questions
41-70	practice stage	increase timed mocks and mistake review
71-85	interview-ready	polish project, HR, and weak topics
86-100	selection-ready	maintain revision and avoid overloading new material
