

GATE Biomedical: Branch Quick Start

GATE Biomedical / Branch Quick Start

Study Hub Premium GATE Sheet

Original revision material generated for structured preparation. Official syllabus and PYQs should be used as the final source of truth.

Branch Map

- Start with the official syllabus for GATE Biomedical. Keep one printed checklist and mark topics after PYQ practice, not after passive reading.
- GATE papers are 100 marks: General Aptitude is common, and the rest comes from the selected paper syllabus.
- Use this branch folder in this order: Syllabus -> Study Material -> Previous Year Papers -> Answer Keys -> Strategy.

First Week Setup

- Day 1: Read official syllabus and mark weak/strong topics.
- Day 2: Solve one previous paper without pressure to understand pattern.
- Day 3: Build formula/definition sheet from high-frequency topics.
- Day 4-6: Finish one core topic with 30-40 mixed questions.
- Day 7: Revise mistakes and update the tracker.

Quality Rule

- Every note should end with one PYQ link, one common trap, and one two-line revision cue.
