

GATE Naval Architecture: Fluid Mechanics Premium Sheet

GATE Naval Architecture / Fluid Mechanics

Study Hub Premium GATE Sheet

Original revision material generated for structured preparation. Official syllabus and PYQs should be used as the final source of truth.

Topic Snapshot

- Topic: Fluid Mechanics
- Branch: GATE Naval Architecture
- Use this sheet as a starter map, then verify exact subtopics from the official syllabus PDF inside this branch.

What To Master

- Definitions and standard symbols used in this topic.
- Core formulae, theorem statements, diagrams, or process steps.
- Boundary cases where a direct formula fails.
- One solved example that shows the exam-style trick.
- One PYQ where this topic appeared directly or as a mixed concept.

PYQ Lens

- First solve topic-wise questions untimed to build accuracy.
- Then solve mixed previous-year questions because GATE often combines two concepts.
- For NAT, write units and valid range before calculation.
- For MSQ, reject every uncertain option one by one instead of guessing all options together.

Mistake Scanner

- Wrong sign, wrong unit, missing assumption, or using a formula outside its condition.
- Reading the question as a familiar pattern without checking exact wording.
- Skipping General Aptitude because it looks easy; GA marks compound quickly.

7-Day Drill

- Day 1: syllabus checklist and one-page notes.
- Day 2: basic solved examples.
- Day 3: medium PYQs.
- Day 4: mixed PYQs.
- Day 5: answer-key review and error log.
- Day 6: mini mock from this topic.
- Day 7: revise only mistakes and formula triggers.
