

Atlassian Syllabus and Round Map

Product Based / Atlassian

Study Hub Premium Placement Pack

This is original study material for preparation. It is not a copied official or proprietary company paper.

Premium Study System

- Track: Atlassian.
- Pack type: SYLLABUS / Syllabus.
- Target outcome: selection-ready confidence for SDE / Software Engineer.
- Core preparation areas: DSA, CS fundamentals, OOP/LLD, HLD basics, behavioral stories, resume projects.
- Use this pack like a mini-book: concept, table, example, practice, analysis, revision.
- Every topic should produce proof: solved questions, mock score, mistake note, interview answer, or resume evidence.

Output Quality Rules

- Read the concept in your own words, then solve without looking at notes.
- Convert every important idea into a comparison table, checklist, or one-line rule.
- Mark important traps as Common Mistake before the mock, not after losing marks.
- Keep a PYQ-style log: question pattern, topic, time taken, mistake reason, retest date.
- Use simple English; add Hindi/Hinglish meaning in brackets when it helps recall.

Priority Matrix

Area	Premium Standard	Proof Before Moving On
DSA	Pattern, invariant, dry run, complexity	2 solved problems per pattern without hints
CS Core	OS, DBMS, CN, OOP with examples	Explain each topic in 60 seconds
Project	Problem, architecture, your contribution, tradeoff	2-minute story plus deep-dive answers
Communication	Crisp intro, structured HR stories, calm tone	5 recorded answers reviewed once

Exam Tip

- Interviewers reward clean reasoning more than memorized code. Say brute force, improve it, dry run, then discuss complexity.

Common Mistake

- Jumping into code without constraints creates wrong edge cases. Ask size, duplicates, sorted/unordered, and expected output first.

Round Map

- Online assessment, coding interview, CS fundamentals, system design basics, behavioral interview.

Topic Checklist

- DSA, CS fundamentals, OOP/LLD, HLD basics, behavioral stories, resume projects.
- Keep one notebook for formulas, patterns, mistakes, and interview stories.
- Mark each topic as Learn, Practice, Mock, Revise.

Deep Syllabus Blueprint

| Block | Must Cover | Practice Evidence |
| DSA Patterns | arrays, strings, hashing, two pointers, binary search, recursion, trees, graphs,

DP, heap, greedy | 40 pattern questions with notes |
CS Fundamentals	OS process/thread/deadlock, DBMS joins/indexing, CN TCP/HTTP, OOP/LLD	30 short answers plus examples
Coding/Logic	input-output, edge cases, complexity, readable naming	dry run table for every answer
Interview	intro, project, strengths, failure, teamwork, why company	STAR notes and 5 mock answers

Syllabus Completion Ladder

- Level 1 Learn: you understand the concept and can explain it simply.
- Level 2 Practice: you can solve basic questions without hints.
- Level 3 Mock: you can solve under timer with controlled accuracy.
- Level 4 Revise: you can recover the idea from your mistake log after 7 days.

Execution Dashboard

Metric	Target	Review Frequency
DSA Questions	10-14 per week	every Sunday
CS Core Notes	4 topics per week	twice a week
Mock Tests	1-2 per week	same day analysis
Interview Practice	5 answers per week	record and review

Weekly Review Ritual

- Pick the top 5 mistakes, rewrite the correct rule, and solve one similar question.
- Remove one weak resume line or prepare one stronger project answer.
- Decide the next week from evidence, not mood.

Final Self Audit

Score	Meaning	Action
0-40	reading stage	finish basics and easy questions
41-70	practice stage	increase timed mocks and mistake review
71-85	interview-ready	polish project, HR, and weak topics
86-100	selection-ready	maintain revision and avoid overloading new material
