

# Hexaware Final Revision Sprint

Service Based IT / Hexaware

## Study Hub Premium Placement Pack

This is original study material for preparation. It is not a copied official or proprietary company paper.

## Premium Study System

- Track: Hexaware.
- Pack type: MATERIAL / Strategy.
- Target outcome: selection-ready confidence for Graduate Engineer / Analyst.
- Core preparation areas: quant, reasoning, verbal, programming logic, CS fundamentals, communication, HR answers.
- Use this pack like a mini-book: concept, table, example, practice, analysis, revision.
- Every topic should produce proof: solved questions, mock score, mistake note, interview answer, or resume evidence.

## Output Quality Rules

- Read the concept in your own words, then solve without looking at notes.
- Convert every important idea into a comparison table, checklist, or one-line rule.
- Mark important traps as Common Mistake before the mock, not after losing marks.
- Keep a PYQ-style log: question pattern, topic, time taken, mistake reason, retest date.
- Use simple English; add Hindi/Hinglish meaning in brackets when it helps recall.

## Priority Matrix

| Area | Premium Standard | Proof Before Moving On |  
| Aptitude | Formula, shortcut, accuracy, time control | 25 mixed questions with 70%+ accuracy |  
| Programming Logic | Loops, arrays, strings, SQL basics | Trace output and write simple code cleanly |  
| Project | Problem, architecture, your contribution, tradeoff | 2-minute story plus deep-dive answers |  
| Communication | Crisp intro, structured HR stories, calm tone | 5 recorded answers reviewed once |

## Exam Tip

- Service assessments reward speed with accuracy. Attempt high-confidence sections first and protect time for easy marks.

## Common Mistake

- Spending too long on one aptitude question reduces total score. Set a strict skip rule and revisit only after easy wins.

## 7 Day Final Sprint

- Day 1: revise syllabus checklist and weak topics.
- Day 2: solve topic-wise practice and update mistake log.
- Day 3: aptitude mixed mock plus programming logic.
- Day 4: CS fundamentals and SQL.
- Day 5: project deep dive and resume questions.
- Day 6: full mock and post-mock analysis.
- Day 7: light revision, HR stories, documents, sleep.

## Do Not Do

- Do not start a brand-new large topic on the final night.
- Do not memorize fake answers.
- Do not ignore mistakes from mocks.

## Premium Study Material Structure

- Concept note: one paragraph in your own words.
- Formula/pattern note: exact rule, when to use, and when not to use.
- Worked example: one solved sample with each step visible.
- Interview angle: how the topic can be asked verbally.
- Revision hook: one mnemonic or one-line trigger.

## Memory Tricks

- APTI: Assumption, Pattern, Time limit, Insight shortcut.
- STAR for HR: Situation, Task, Action, Result.
- PACT for projects: Problem, Architecture, Contribution, Tradeoff.

## One-Liners For Revision

- Accuracy grows from mistake analysis, not from collecting random PDFs.
- A topic is ready only when you can teach it without opening notes.
- A resume skill is safe only when you can answer two follow-up questions.

## Execution Dashboard

| Metric | Target | Review Frequency |  
 | Aptitude Sets | 5 timed sets per week | every Sunday |  
 | CS Core Notes | 4 topics per week | twice a week |  
 | Mock Tests | 1-2 per week | same day analysis |  
 | Interview Practice | 5 answers per week | record and review |

## Weekly Review Ritual

- Pick the top 5 mistakes, rewrite the correct rule, and solve one similar question.
- Remove one weak resume line or prepare one stronger project answer.
- Decide the next week from evidence, not mood.

## Final Self Audit

| Score | Meaning | Action |  
 | 0-40 | reading stage | finish basics and easy questions |  
 | 41-70 | practice stage | increase timed mocks and mistake review |  
 | 71-85 | interview-ready | polish project, HR, and weak topics |  
 | 86-100 | selection-ready | maintain revision and avoid overloading new material |

## Source Note
