

Intuit Essential Syllabus Pack

Product Based / Intuit

Study Hub Premium Placement Pack

This is original study material for preparation. It is not a copied official or proprietary company paper.

Premium Study System

- Track: Intuit.
- Pack type: SYLLABUS / Syllabus.
- Target outcome: selection-ready confidence for SDE / Software Engineer.
- Core preparation areas: DSA, CS fundamentals, OOP/LLD, HLD basics, behavioral stories, resume projects.
- Use this pack like a mini-book: concept, table, example, practice, analysis, revision.
- Every topic should produce proof: solved questions, mock score, mistake note, interview answer, or resume evidence.

Output Quality Rules

- Read the concept in your own words, then solve without looking at notes.
- Convert every important idea into a comparison table, checklist, or one-line rule.
- Mark important traps as Common Mistake before the mock, not after losing marks.
- Keep a PYQ-style log: question pattern, topic, time taken, mistake reason, retest date.
- Use simple English; add Hindi/Hinglish meaning in brackets when it helps recall.

Priority Matrix

Area	Premium Standard	Proof Before Moving On
DSA	Pattern, invariant, dry run, complexity	2 solved problems per pattern without hints
CS Core	OS, DBMS, CN, OOP with examples	Explain each topic in 60 seconds
Project	Problem, architecture, your contribution, tradeoff	2-minute story plus deep-dive answers
Communication	Crisp intro, structured HR stories, calm tone	5 recorded answers reviewed once

Exam Tip

- Interviewers reward clean reasoning more than memorized code. Say brute force, improve it, dry run, then discuss complexity.

Common Mistake

- Jumping into code without constraints creates wrong edge cases. Ask size, duplicates, sorted/unordered, and expected output first.

Essential Syllabus

- Core preparation areas: DSA, CS fundamentals, OOP/LLD, HLD basics, behavioral stories, resume projects.
- Must cover: DSA patterns, CS fundamentals, project depth, OOP/LLD, HLD basics, behavioral stories.
- Keep every topic in four states: learn, practice, mock, revise.

Round Mapping

- Screening: resume, eligibility, and basic fit.
- Assessment: aptitude/coding/technical questions based on role.
- Interview: project, fundamentals, communication, and HR clarity.

Completion Rule

- Do not mark a topic complete until you can solve two questions without notes and explain it in one minute.

Deep Syllabus Blueprint

| Block | Must Cover | Practice Evidence |

| DSA Patterns | arrays, strings, hashing, two pointers, binary search, recursion, trees, graphs, DP, heap, greedy | 40 pattern questions with notes |

| CS Fundamentals | OS process/thread/deadlock, DBMS joins/indexing, CN TCP/HTTP, OOP/LLD | 30 short answers plus examples |

| Coding/Logic | input-output, edge cases, complexity, readable naming | dry run table for every answer |

| Interview | intro, project, strengths, failure, teamwork, why company | STAR notes and 5 mock answers |

Syllabus Completion Ladder

- Level 1 Learn: you understand the concept and can explain it simply.
- Level 2 Practice: you can solve basic questions without hints.
- Level 3 Mock: you can solve under timer with controlled accuracy.
- Level 4 Revise: you can recover the idea from your mistake log after 7 days.

Execution Dashboard

| Metric | Target | Review Frequency |

| DSA Questions | 10-14 per week | every Sunday |

| CS Core Notes | 4 topics per week | twice a week |

| Mock Tests | 1-2 per week | same day analysis |

| Interview Practice | 5 answers per week | record and review |

Weekly Review Ritual

- Pick the top 5 mistakes, rewrite the correct rule, and solve one similar question.
- Remove one weak resume line or prepare one stronger project answer.
- Decide the next week from evidence, not mood.

Final Self Audit

| Score | Meaning | Action |

| 0-40 | reading stage | finish basics and easy questions |

| 41-70 | practice stage | increase timed mocks and mistake review |

| 71-85 | interview-ready | polish project, HR, and weak topics |

| 86-100 | selection-ready | maintain revision and avoid overloading new material |
