

Salesforce Round Wise Playbook

Product Based / Salesforce

Study Hub Premium Placement Pack

This is original study material for preparation. It is not a copied official or proprietary company paper.

Premium Study System

- Track: Salesforce.
- Pack type: MATERIAL / Round Plan.
- Target outcome: selection-ready confidence for SDE / Software Engineer.
- Core preparation areas: DSA, CS fundamentals, OOP/LLD, HLD basics, behavioral stories, resume projects.
- Use this pack like a mini-book: concept, table, example, practice, analysis, revision.
- Every topic should produce proof: solved questions, mock score, mistake note, interview answer, or resume evidence.

Output Quality Rules

- Read the concept in your own words, then solve without looking at notes.
- Convert every important idea into a comparison table, checklist, or one-line rule.
- Mark important traps as Common Mistake before the mock, not after losing marks.
- Keep a PYQ-style log: question pattern, topic, time taken, mistake reason, retest date.
- Use simple English; add Hindi/Hinglish meaning in brackets when it helps recall.

Priority Matrix

| Area | Premium Standard | Proof Before Moving On |

| DSA | Pattern, invariant, dry run, complexity | 2 solved problems per pattern without hints |

| CS Core | OS, DBMS, CN, OOP with examples | Explain each topic in 60 seconds |

| Project | Problem, architecture, your contribution, tradeoff | 2-minute story plus deep-dive answers |

| Communication | Crisp intro, structured HR stories, calm tone | 5 recorded answers reviewed once |

Exam Tip

- Interviewers reward clean reasoning more than memorized code. Say brute force, improve it, dry run, then discuss complexity.

Common Mistake

- Jumping into code without constraints creates wrong edge cases. Ask size, duplicates, sorted/unordered, and expected output first.

Round Wise Playbook

- Round 1: OA with DSA. Read constraints, pick pattern, code cleanly, dry run loudly in notes.
- Round 2: technical interview. Explain brute force, optimized approach, edge cases, and complexity.
- Round 3: project discussion. Use problem, users, architecture, your contribution, tradeoff, impact.
- HR round: keep answers honest, short, and positive. Show learning speed and ownership.

Salesforce Day Before Checklist

- Revisit resume bullets.
- Revise mistake tracker.

- Practice one mock intro.
- Keep documents, links, and project demo ready.

Premium Study Material Structure

- Concept note: one paragraph in your own words.
- Formula/pattern note: exact rule, when to use, and when not to use.
- Worked example: one solved sample with each step visible.
- Interview angle: how the topic can be asked verbally.
- Revision hook: one mnemonic or one-line trigger.

Memory Tricks

- CODER: Constraints, Options, Dry run, Edge cases, Runtime.
- STAR for HR: Situation, Task, Action, Result.
- PACT for projects: Problem, Architecture, Contribution, Tradeoff.

One-Liners For Revision

- Accuracy grows from mistake analysis, not from collecting random PDFs.
- A topic is ready only when you can teach it without opening notes.
- A resume skill is safe only when you can answer two follow-up questions.

Execution Dashboard

Metric	Target	Review Frequency
DSA Questions	10-14 per week	every Sunday
CS Core Notes	4 topics per week	twice a week
Mock Tests	1-2 per week	same day analysis
Interview Practice	5 answers per week	record and review

Weekly Review Ritual

- Pick the top 5 mistakes, rewrite the correct rule, and solve one similar question.
- Remove one weak resume line or prepare one stronger project answer.
- Decide the next week from evidence, not mood.

Final Self Audit

Score	Meaning	Action
0-40	reading stage	finish basics and easy questions
41-70	practice stage	increase timed mocks and mistake review
71-85	interview-ready	polish project, HR, and weak topics
86-100	selection-ready	maintain revision and avoid overloading new material
