- Step 2: Convert this sheet into a one-page note and a short practice set.
- Step 3: Solve PYQ, mock, or board-style questions from the same folder family.
- Step 4: Add every mistake to one error log and revise it weekly.

Premium Content

- Build one formula grid for kinematics, NLM, work-energy, circular motion, COM, and rotation.
- For every problem, mark the system, constraint, force diagram, and conservation law before calculation.
- Advanced signal: combine energy, momentum, and geometry instead of memorising isolated formulas.

Output Checklist

- One syllabus map or chapter map is complete.
- One practice set is attempted in timed mode.
- Wrong answers are grouped by concept, careless error, or time pressure.
- Next revision date is written before closing this pack.
