

SSC CGL Daily Calculation Drill Planner

SSC CGL / Tier Prep / Quantitative Aptitude

Premium Snapshot

Exam: SSC CGL

Subject: Quantitative Aptitude

Topic: Daily Speed Routine

This Study Hub premium pack is a guided sheet. Keep official syllabus, official notices, and standard books as the source of truth.

Study Flow

- Step 1: Open the matching syllabus or textbook folder first.
- Step 2: Convert this sheet into a one-page note and a short practice set.
- Step 3: Solve PYQ, mock, or board-style questions from the same folder family.
- Step 4: Add every mistake to one error log and revise it weekly.

Premium Content

- Morning 15 minutes: write tables 2 to 30, squares 1 to 50, cubes 1 to 30, and fractions $\frac{1}{2}$ to $\frac{1}{30}$ in rotation.
- Random products: solve 30 products daily, such as 17×13 , 28^2 , 43×19 , 37^2 , and 24^3 without calculator.
- PYQ burst: solve 20 SSC CGL quant questions in 15 minutes. Mark every slow calculation separately.
- Error log: label mistakes as formula recall, value recall, arithmetic slip, option filtering, or reading error.
- Weekly test: one day tables, one day squares, one day cubes, one day fractions, one day triplets, one day mixed PYQ.
- Exam approach: if a question takes more than 45 seconds without progress, skip and return after easy marks are secured.
- Revision loop: 7 days continuous recall is better than one long sitting. Keep the same notebook and repeat the same sheet.

Output Checklist

- One syllabus map or chapter map is complete.
- One practice set is attempted in timed mode.
- Wrong answers are grouped by concept, careless error, or time pressure.
- Next revision date is written before closing this pack.
