

SSC CGL Fast Calculation Master Sheet

SSC CGL / Tier Prep / Quantitative Aptitude

Premium Snapshot

Exam: SSC CGL

Subject: Quantitative Aptitude

Topic: Speed Arithmetic and Advanced Maths

This Study Hub premium pack is a guided sheet. Keep official syllabus, official notices, and standard books as the source of truth.

Study Flow

- Step 1: Open the matching syllabus or textbook folder first.
- Step 2: Convert this sheet into a one-page note and a short practice set.
- Step 3: Solve PYQ, mock, or board-style questions from the same folder family.
- Step 4: Add every mistake to one error log and revise it weekly.

Premium Content

- Quant: arithmetic, algebra basics, number system, time-work, ratio, and data interpretation are the first scoring layer.
- Reasoning: puzzles, seating, syllogism, coding-decoding, blood relation, and series need timed mixed practice.
- English: daily RC, para-jumble, grammar error log, and vocabulary revision should run together.
- SSC quant needs fixed recall first: tables, squares, cubes, fractions, triplets, unit digit, and digital sum.
- Target speed: common calculation values should be recognised in 1 to 2 seconds before full solution begins.
- Question type order: number system, percentage, ratio, SI-CI, profit-loss, time-work, geometry, trigonometry, DI.
- Fast attempt rule: identify formula, reduce options using unit digit or digital sum, then calculate only what remains.

Output Checklist

- One syllabus map or chapter map is complete.
- One practice set is attempted in timed mode.
- Wrong answers are grouped by concept, careless error, or time pressure.
- Next revision date is written before closing this pack.
