

SSC CGL Reasoning Pattern Speed Sheet

SSC CGL / Tier Prep / Reasoning

Premium Snapshot

Exam: SSC CGL

Subject: Reasoning

Topic: Analogy Series Coding Calendar Clock Venn

This Study Hub premium pack is a guided sheet. Keep official syllabus, official notices, and standard books as the source of truth.

Study Flow

- Step 1: Open the matching syllabus or textbook folder first.
- Step 2: Convert this sheet into a one-page note and a short practice set.
- Step 3: Solve PYQ, mock, or board-style questions from the same folder family.
- Step 4: Add every mistake to one error log and revise it weekly.

Premium Content

- Reasoning speed comes from pattern recognition. First name the pattern, then solve.
- Treat every wrong answer as one of four mistakes: wrong pattern, missed condition, careless direction, or slow diagram.
- Alphabet positions: A=1 to Z=26 and reverse positions Z=1 to A=26 should be instant.
- Opposite alphabet pairs: AZ, BY, CX, DW, EV, FU, GT, HS, IR, JQ, KP, LO, MN.
- Coding-decoding: check direct position, reverse position, +n/-n shift, alternate shift, and vowel/consonant treatment.
- Number series: first check difference, second difference, multiplication, square/cube pattern, and alternating series.
- Analogy: identify relation first: synonym, antonym, part-whole, tool-use, worker-place, animal-young, country-capital, number operation.
- Direction: draw north first, update turn by turn, and mark final displacement as horizontal plus vertical components.
- Blood relation: convert every statement into generation level: grandparent +2, parent +1, sibling 0, child -1.
- Calendar odd days: normal year has 1 odd day, leap year has 2 odd days, 100 years has 5 odd days, 400 years has 0 odd days.
- Clock angle: $\text{angle} = |30H - 11M/2|$. If angle exceeds 180, subtract from 360.
- Syllogism: draw minimum Venn diagram and test only the conclusion, not personal meaning.
- Venn diagram: all, some, no, and possibility cases should be separated; never mix definite and possible conclusion.
- Dice: opposite faces never appear together. If two positions share two common faces, the remaining faces are opposite.
- Cube counting: paint exposure decides category: 3 faces at corners, 2 faces on edges, 1 face on surface centers, 0 faces inside.
- Mirror/water image: in mirror image left-right changes; in water image top-bottom changes.
- Practice rule: 15 mixed reasoning questions daily with reason code written beside every wrong answer.
- Timed routine: 5 analogy, 5 series, 5 coding-decoding, 5 direction/blood relation, and 5 mixed visual questions daily.

Output Checklist

- One syllabus map or chapter map is complete.

- One practice set is attempted in timed mode.
- Wrong answers are grouped by concept, careless error, or time pressure.
- Next revision date is written before closing this pack.
